

# CYBER CHARTER SCHOOLS

Public charter schools, cyber charter schools, or charter academies are **public schools** that operate with a greater degree of independence than traditional district schools.

## What is a Cyber Charter School?

Charter-established and online-based, a Cyber Charter School is an educational opportunity and option for children in kindergarten through 12th grade to enroll in and attend a school on the Internet that focuses on individual-student-centered. The online environment of a Cyber Charter has significant benefits, including individualized study and learning space for students and families with unique needs and desires.

## How do I enroll in a cyber charter?

Enrolling in a charter school is very easy. Start by find the school you want your child(ren) to attend. Then contact the school and fill out thier application, Once approved you will have to provide all needed documents to complete enrollment.

## What is the cost of cyber charter school in PA?

Because charter schools and cyber charter schools are independently operated public schools, they do not charge students tuition.

## What are the benifits of cyber charter school?

Cyber Charter School allows students to work at a speed that fits their individual learning needs. Students have an extended period to complete work, allowing them to work ahead or spend extra time on assignments. This setup helps:

- Gifted students move faster than in other educational settings.
- Special Education students work in the safety and support of a home environment.
- Students take specialized courses rarely offered by local districts.
- Children of families that travel often.
- Athletes with difficult scheduling needs.
- Those focusing on the arts and needing extra time to develop their talents.

Combining the best interactive curriculum with skilled teachers who are online every day helps students connect with the material and with their teachers.
